About me:

Full-stack developer passionate about crafting scalable web applications. Experienced in PHP, React, JavaScript, and other modern frameworks, delivering clean, maintainable code to solve real-world challenges. Currently building and enhancing SaaS platforms that streamline business operations and improve user experiences.

Skills:

- **Frontend:** HTML, CSS, JavaScript, React, Vue, Tailwind
- **Backend:** PHP, Python, MySQL, Firebase, MongoDB, Node.js
- **Tools & others:** Git/GitHub, Arduino, Kotlin, Docker, Agile

Work Experience:

HotelKey - January 2026

Frontend Developer

- Engineered dynamic and responsive web interfaces, improving usability and user engagement
- Optimized frontend performance and ensured cross-browser compatibility
- Worked closely with designers and backend developers to deliver seamless features

Projects:

Appointly

A webplatform built with **React** and **Tailwind** for efficient business appointment management.

- **Developed** dynamic appointment management platform using React and Tailwind for businesses
- **Designed** responsive front-end for seamless mobile and desktop experience **Integrated** AI chatbot to assist customers in booking appointments efficiently

Digital Sea

An e-commerce website built with **PHP**, **HTML**, **CSS**, and **JavaScript**.

- **Developed** dynamic product pages, shopping cart, and checkout functionality using PHP and JavaScript
- **Designed** responsive front-end layout with HTML and CSS for mobile and desktop users
- **Implemented** basic **admin panel** for managing product listings and categories

Education:

Master of Computer Science - University of Prishtina

2025 - Current

- Advancing expertise in software engineering, algorithms, and scalable systems design.
- Deepening knowledge in databases, web development, and system architecture.
- Relevant coursework: Data Structures & Algorithms, Databases, Web Development, Operating Systems, Software Engineering.

Bachelor of Computer Science - University of Prishtina

2022 - 2025

- Developed a solid foundation in software engineering, algorithms, and data management.
- Gained practical experience in web development and system design principles.
- Relevant coursework: Data Structures & Algorithms, Databases, Web Development, Operating Systems, Software Engineering.

High-School Graduate - Specialized Mathematics High School

2019 - 2022

- Built strong analytical and problem-solving skills through advanced mathematics and logical reasoning.
- Established a foundation for computer science studies and algorithmic thinking.

Other Skills & Certifications:

IoT Applications Certification

- Hands-on experience with Raspberry Pi, Arduino, and LittleBits
- Developed practical solutions involving embedded systems and hardware-software integration.

Amazon Web Services (AWS) – Student Engagement Program 2025

- Awarded **2nd Place** among participating teams
- Received **Best Technical Implementation Award** for excellence in system design and execution
- Collaborated in a team environment to build and present a scalable technical solution

English Proficiency (C2 Level) – Fluent in both written and spoken English; strong ability in technical communication and documentation

Volunteer & Teamwork Experience – Fondacioni Freskia

- Contributed to community initiatives supporting orphans and individuals in need
- Demonstrated teamwork, empathy, and organizational skills in social impact activities
